

ONIA APP DOWNLOAD

Go to the App Store or Google Play Store and search for the ONIA Plus App. Install the app on your smartphone.

Find a detailed description of the app at:
www.onia-light.com

REGISTRATION

Activate the bluetooth connection on your smartphone and start the ONIA Plus App.

- 1 Register your Onia by touching the + button (Add product).

- 2 Touch this area to search for your Onia.

- 3 If your Onia is set in the 2nd field, enter a name for the Onia here and then press the button "Add Onia".

HOW TO USE ONIA

- 1 Press the power button for about 3 seconds. When the red light on the back lights up, Onia is switched on and Bluetooth is active.

- 2 Fully charge the battery. To do that, connect the Micro USB cable to the Onia light. The control light on the back right lights up blue when charging is complete.

* To save power and to turn off the lamp (e.g. when transporting), press the on/off button as described under item 1. for about 3 seconds. To activate the lamp, press the power button again for 3 seconds - the lamp is on and Bluetooth is active.

- 3 The color of the upper and lower light cube changes by touching the respective button.

- 4 By pressing the AUTO button, the color of the upper and lower cube automatically changes. By pressing of the AUTO button for about 3 seconds all buttons are locked and Onia is no longer operable. When pressing for 3 seconds again, all buttons are unlocked. When the lock function is activated, the control light located left on Onia's backside lights up purple (violet).

ONIA APP FUNCTION

Manual color selection

The light-colors can be controlled directly via the app. At ONIACOLOR you can choose from 14 colors 196 different color combinations. At COLORPICKER you have the possibility to choose from 16 million colors.

Mode

Life Mode (static) - useful colors for everyday life.
Natural Mode (dynamic) - color combinations from nature.
Favorite Mode - here you can save your own color combinations.

Today's Color

The last selected color-consulting appears.

Setting

Here, the biorhythm is set by entering the birth date.

Timer

The wake-up function automatically turns on the light at the set time, e.g. wake-up call service. The asleep function turns off the light at the set time.

Fun

The light-color changes by shaking the smartphone.

Sensor function

By lightly tapping with a hard object (pen or fingernail) at the upper or lower cube, you can change the color in the respective area.
